OPUS is the new generation of spectral sensors for online measurement of nitrogen and carbon compounds. Through the analysis of a full spectrum, OPUS is able to deliver reliable readings for  $\text{NO}_3\text{-N}$ ,  $\text{NO}_2\text{-N}$ , organic ingredients ( $\text{COD}_{\text{eq}}$ ,  $\text{BOD}_{\text{eq}}$ ,  $\text{DOC}_{\text{eq}}$ ,  $\text{TOC}_{\text{eq}}$ ), and a number of other parameters.

OPUS features the new TriOS G2 interface, allowing fast and easy configuration of sensors by using a web browser.

Integration into existing process control systems and external data loggers has never been easier.

With the optional battery pack, mobile applications are also feasible. WiFi connectivity allows laptops, tablets or smartphones to be easily used for control without any special application software or app installation.

## OPUS G2 Interface

The easiest and fastest way of sensor integration and configuration in any process control system or data logger via web browser:

The figure displays three separate windows of the OPUS G2 software interface:

- MEASUREMENT:** Shows current measurement data for various parameters like N-NO<sub>2</sub>, TS8eq, System1, CODeq, BODeq, and HA. It includes sections for Overview, Peripherals, Calibration, **Measurement** (selected), Data Logger, System, and Service. Buttons for Measure Now!, Measure Absorption!, Measure RAW!, Measure RAW Light!, Measure RAW Dark!, and Save are present.
- CALIBRATION:** Shows a spectrum graph titled "WATERBASE" with a "Download" button. It includes sections for Overview, Peripherals, **Calibration** (selected), Measurement, Data Logger, System, and Service. A "Calibrate!" button is visible.
- PERIPHERALS:** Shows digital I/O settings for Transceiver (RS-232), Protocol (Modbus RTU), Baudrate (9600), Flow Control (None), Parity (None), and Stop Bits (One). It also shows protocol settings for Address (1) and a Save button. Sections include Overview, Peripherals (selected), Calibration, Measurement, Data Logger, System, and Service.

Let OPUS automatically monitor your processes and react to unexpected events or incidents with the optional "policing" feature of OPUS.
